

Year 6 - Week Commencing 5th March 2018

Maths This week we will be looking at the following:

- Comparing quantities using the language of ratio and proportion.
- Solving problems involving direct proportion by scaling quantities up or down.
- Solving problems involving unequal sharing and grouping.

This week's test will be on calculating with fractions. Adding, subtracting, and multiplying fractions. Multiplying and dividing fractions by whole numbers.

English

This week the children will be completing their own discussion text based on hunting. They will be using the vocabulary that they have collected to help them and it will be really important to maintain a formal tone. We will also be looking at how we can use higher-level punctuation and some of the Year 5/6 tricky spellings – please see the sheet that was sent home before the holidays. Towards the end of the week, the children will be starting an independent piece of writing that will be used for assessment purposes. They have been set a homework task linked to this and it will help them greatly if they can complete this by Thursday.

Theme this half term...

RE - Christianity and the Church

Science – The Human Body.

A few weeks ago we enjoyed a visit to the Baptist church. The children will be completing a piece of writing linked to this.

Extras

PE will be on Wednesday and Friday afternoon this week. Please ensure that your child has a **school PE kit** in school for these lessons.

My PPA time will be on Wednesday afternoon

Homework :

Two activities have been set on Active Learn that should be completed by Friday.

Homework also includes reading as much as possible at home.

A huge well done to all those children that completed the practise papers that were sent home before the holidays. 😊

Spelling Focus:

-ibly and -ably suffix endings
